SEASON EAST COAST

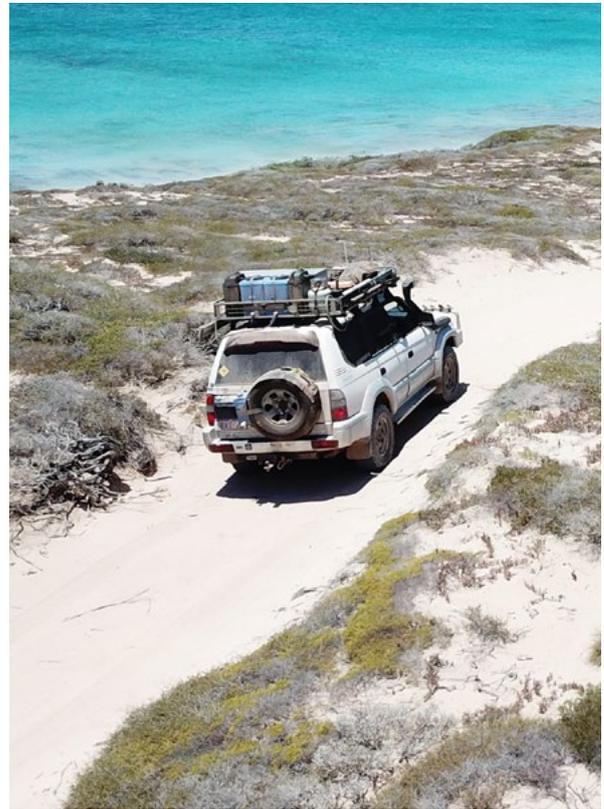

Seasons

The climate on the East Coast is fairly pleasant throughout the year. Be careful during the rainy season in the north of Queensland, which is prone to heavy rainfall between December and March. During winter it can get fresh in the South (May - August). We recommend avoiding those Months to enjoy the most of your road trip. The best time to visit the East Coast is the mid-season. Which is between March and May, or between September and November.

Road Trip Duration

The duration of your road trip depends on many things (budget, personal restrictions, activities planned etc). If you plan to do Sydney - Cairns, 3 to 4 weeks may be enough.

However, if you plan to start south of the coast and travel further than Cairns, allow at least a month and a half or even two if you wish to take your time. Know that it there are 3600 km between Eden (in the South) and Cooktown (to the North).

Good to know

The wet season lasts from December to February in the north of the country. Some roads are at risk of being flooded and inaccessible. Plan your road trip accordingly
